I declined, but could not retrain from surprisedly inquiring:

"If that is your junior editor how old might your senior editor be?"

"Oh, our junior editor is quite young in the newspaper business compared with our senior editor, Mr. Caleo Foote," replied the foreman complacently. "Our junior editor, Nathaniel A. Horton, came into the office only forty-two years ago. Mr. Foote began work as an apprentice on the Gazette in 1817, and our Mr. Thomas Cushing was his employer."

This iar exceeds the record of Thurlow Weed, This 'ar exceeds the record of Thurlow Weed, who gained the soubriquet of 'Nestor of the American Press." Nearly every journal in the country has referred to him as 'editor for over half a century.' Yet his active editorial life only covered the years between 1881, in Albany, and 1888, in New York, when he permanently withdrew from editorial work. But Caleb Foote, who will be eighty-five years of age next February and who is as lively on his legs as a lad of twenty, has been constantly in service upon this one paper slace 1817—upward of seventy years—and an actual proprietor and every-day-sure-enough editor since 1825, comprising sixty-three years of continuous editorial duty. Any man who can live through that amount of headaching, back-breaking grind is a hero, and there should be a bronze bust of him on every editorial desk throughout the land.

We had just stopped one evening near Hay Springs, Net. , and were building a camp-fire when Springs, Net., and were outlains a camp-ire when we saw quite an old man coming along the road from towards the town. He was somewhat stooped and walked slowly. He had a benevolent expression, but looked melancholy, as if in trouble. When he came to where we were he stopped and taixed with us some little time.

'I might 'a' been home before this," he said after a while, "if I had walked along as I generally do, but I don't feel like it."

'Are you sick?" I asked.

'Oh, no, I s'pose I'm well enough—it's trouble that alls me; my oldest boy, 'bout sixteen, is in jail down at the Springs."

'Is that so? Too bad. What is the charge against him?"

"He was takin' a pair of boots that were bangin' front of a shoe store for a sign and a policeman see him," and the old man gazed at the ground.

'That is said," I replied sympathetically, "very sad. There can't be anything much harder to bear than to have such a son."

"Yes," replied the old man sadly. "Yes, it's pretty rough at my age to have that kind of a boy. There san't no excuse for it, neither; I told him he'd got to be mighty keerful or they'd snatch him. I reckon the next time I want a pair o' boots I'll lift 'em myself! And here it is right in co'n-shuckintime, too, and he won't be out o' jail for a month, mebby." we saw quite an old man coming along the road

Mexican's Strange Fate-He Suddenly Falls to Pieces, Limb from Limb, With-out Apparent Cause-A Man Laces Himself to Death-Searching for a Pirate's Treasure-The Decline of Cock-Fighting

The little Mexican pueblo of Tequusquite, in Nev Mexico, has had two important sensations within a year, and singularly enough the same family have furnished both.

It was a lovely morning last July when Santiage

Sanchez Gallegos dismounted from the patient burro he had been riding across the prairies from springs about a half mile from Tegeusquite. Kneeling down he refreshed himself with a long draught, and after doing so, stood up, grumbled a few curses at the slowness of his animal, and then literally fell to pieces. First his right arm, then his left, then his ears and nose. To be brief, in a few moments where he as a whole had been standing, Santiago in fragments covered the ground. A few hours later a couple of sheep herders who were driving their flocks to water came upon the dismembered remains. Horror-stricken at the sight, they aban doned their flocks and fled to the village, plously grossing themselves all the way, and at intervals calling ppon "El buen Dias" and "Santa Maria" to protect them from the evil one whose foul work they were sure they had just left behind. The simple people were soon aroused, and in an alarmed state hurried to the residence of the padre. He assembled them in the little adobe church in the centre of the village, bid the sheep herders tell their story, and when they had finished he promptly rose and preached an able aermon in which he assured his congregation that Santiago had perished through the visitation of God as a just punishment for refusing to pay tithes to the church and padre. He forbade anybody to visit the apot where the unfortunate man had died for forty days. At the expiration of that period a procession, headed by the padre and an acolyte bearing a vessel of blessed water, which was plentifully sprinkled all along the rente, marched to the spring. All they found there was a few whitened bones and, the spring had dried up. Back to the church marched the procession, another dacourse in white the dried spring was alluded to in support of the padre's assertions, and the matter was allowed to drop. But it was a hardy Mexican who would pass by that spot after nightfall or refuse to contribute whenever levied upon. This was the first sensation, though the facts have only just come to light. The second happened two weeks ago.

A merry wedding party were assembled at the house of Dolores Bacs one evening, and as usual with weddings, festivities were progressing finely when Pedro Gallegos, the fourteen-year-old son of old Santiago, drew his revoiver, and, without warning or cause, shot and instantly killed the bridegroom as he was in the act of drinking a toast to the bride. Another Mexican intertered and the young desperado fred what shots remained in his revolver at him. He died in a few hours. Both murders were effected so suddenly that before the people recovered from their surprise the murder were effected as outdenly that before the people recovered from their surprise the murder of the adage that "Death lurks at a wedding least," was proven in this instance.

Two days ago some cowboys were riding along the trail through Tequesquite, and by the dried spring they found the dead body o alarmed state hurried to the residence of the padre. He assembled them in the little adobe church in

Augusta was the central battle-ground of the Atlantic and Gulf States. Some of the greatest mains ever fought were contested at the old Lafayette race course and at the "Old Shades," just in rear of the Central Hotel. There gathered the professional men and the pianters, the wealth-lest and most distinguished men of the country, who were patrons of the sport. They carried in convenient side coat pockets leather wallets, from between the leaves of which protruded \$100 bills freshly drawn from the banks to back their favorite cocks. None were allowed to participate in the aport who were not considered gentlemen. When a bet was made no money was shown. A gentleman's word was as good as his money naill the fight was ended, when the loser produced the cash. Several mains were fougat in Augusta, where \$5,000 was wagered on the odd fight and \$250 on each battle, while small fortunes were bet outside of the regular stakes. Among the finest breeds of games were the Dusty-Millers and War Horses, imported from Ireland; the Willisslakers, from Maryland; the Stonefences, from Norta Carolina; the Indian Spring, Dominiques, from Georgia; the Oakleys, from Alausma, and the Bille Reis. Lafayette race course and at the "Old Shades," Horses, imported from Ireland; the Willissiakers, from Maryland; the Sonefences, from North Carolina; the Indian Spring, Dominiques, from Georgia; the Oakleys, from Alabama, and the Blue Reds, Redbreasted and Shawinceks, from South Carolina. All of these were endowed with "staying" qualities. Cold steel did not make them nervous. Death alone removed them from the pit. They were thoroughbreds and highly "ristocratic. Many of these strains are still raised in various States, the most distinguished of those of the present day being the famous "war-horse" breed. A gentleman, who now occupies a high place in his church, imported the first of this stock from Ireland along in 1858. In those days fine birds were often removed from their shipping cages in transit and poorer ones substituted. So careful was the breeder of these thrias to have his stock reach its destination that he dipped several feathers from the under part of the wings and sent them by mail to the importer. When the birds arrived their feathers were placed in the original position, and as they matched perfectly, the purchaser was sure that he had received the right birds. Although, as I said, this gentleman is now a bright ornament to his church, he carries those feathers around with him to this day to prove that he first introduced the noblest strain of game cocks ever known in America.

Away back in the fortles, one of the most galiant men that ever lived in the grand old county of Edgefield, carried his red-breasted games to Mexico and pitted them against the Emperor Santa Anna's famous black olds. The stakes on the contest were something fabulous. The result was a triumphant victory for the South Carolinian, and the generous, though defeated, Emperor presented his opponent with a pair of gaffs—the weapon of the game cock, constructed of the finest Damascus steel, richly carved and ornamented. A few years later the Falmetto regiment led the conquering army of the Union to the Mexican capital, and the victory of the birds became the forernaner of tha

As late as 1877 cock fighting received the sanction of many prominent Souta Carolinians. In that year a bill to prohibit it was defeated in the Legis-lature. Three of the Senstors, noted for their dis-

year a bill to prohibit it was deteated in the Legislature. Three of the Senators, noted for their distinguished gallantry in war, their able services in
peace and their spotless integrity at all times, opposed the measure and killed it.

A few years later the Anti-Duelling law was
passed. This indicated a radical change in the
sentiment of the people from ante-bellum ideas.
Personal combata to settle personal differences
were legally declared dishonorable, and branded
as crime. A short while later cock-fighting ceased
to be respected, and to-day is prohibited and made
odious by law.

money digging, came here in the Maria, and no donbt was in her at Old Providence. If the reports about the treasure in question come from him, and these parties have gone in search of it from that man's statements, then it is indeed a "wild goose chase" of the most gigantic kind.

About four years ago this man was in Kingston, Jamaica, told a tale similar to the above, and got the merchants and other men worked up to a high pitch of excitement—so much so that they fitted out an expedition and went in search of the treasure. He stated he was afraid that while he was at work getting the treasure—which he described as being immense lots of gold coin, gold candiesticks, platens and chalices, which were stolen from churches from time to time, and a large lot of diamonds, jeweiry, &c.—the Spaniards would attack him and his party and the expedition would fail.

So great was the excitement that an appeal was made to the Governor-General of Jamaica, who ordered a gunboat to accompany the expedition. They proceeded to the point named, and instead of finding prodigious caves, &c., as regorted, they found nothing but a low swamp. Reports further say that the Captain of the gunboat became so angry that the lying informer was compelled to jump overboard. The disappointed expedition returned to Jamaica, and the language used towards him was anything but complimentary.

Rather a singular and sudden death occurred at Rushville a few days ago from the effects of overexertion in a ball-room. William Fry (colored) was said to wear a corset tightly laced on such occasions, and while dancing slipped and fell once or twice, causing internal injuries which caused his death in less than forty-eight hours. He was buried yesterday.

A short time ago a delegation from Washington called on him for permission to suggest his name for the United States Fisheries Commission, but owing to his many duties here he was forced to decline the courtesy.
At present he is identifying himself with the oyster fisheries. As long as memory can recall, refuse matter of all kinds has been dumped into the oyster bays, indifferent to the plant and the consequences. Of late years, it is said, scows and barges, instead of following the laws regulating the dumping of mud and garbage, have started from their docks at or about sundown, and when darkness enveloped them sufficiently to prevent identity their loads were dropped, without regard to location. It is claimed that in many instances the oyster beds were affected

In regard to the first-named matter, Mr. In regard to the first-named matter, Mr. Blackford has joined with Oyster Protector Joseph W. Mersereau in waging war upon the objectionable oil and gas companies with such success that indictments for polluting the waters of the bay have been found in two cases, of which detailed accounts have appeared in The World.

With reference to the second matter, Mr. Blackford proposes and Protector Mersereau suggests in his last report that an amendment be made to the present law that will make it criminal to dump refuse from scows or barges in New York Harbor other than between the hours of sunrise and sunset, and

Remarkable Instance of Faith Cure.

[From the Kansas City Star.]
**Do I believe in faith cure?" meditated a physician last night, after being asked that question by a reporter. "Well, I don't know but that I do in some degree. I believe in thorough faith or even superstition curing diseases. As an example provsuperstition curing diseases. As an example proving that absolute faith sometimes does effect marvellous cure, I will tell you of an intelligent lady in New York City who cured a goltre in a most marvellous manner. She once told me previous to the cure that she had heard and really believed that if she could rub the hand of a corpse across her throat three times it would relieve her of her disease. In order to make the cure more certain, she said it was necessary to perform the terrible experiment without the knowledge of a single human being. She afterwards told me that she had succeeded in stepping into a room where a corpse was lying, and had actually been brave enough to rub its cold hand three times across her neck. She said she had perfect faith in the emcacy of the treatment, and in two weeks thereafter the goltre had entirely disappeared.

[From the Chicago Herald.]
It sometimes pays to be generous. There are plenty of men who don't know this, but it is a fact. Some time ago a Mr. Perkins, who travels for Keith Brothers, was out in Cheyenne on one of his tradeconquering tours. Constitutional Catarrh.

No single disease has entailed more suffering or hastened the breaking up of the constitution than Ca-tarrh. The sense of smell, of taste, of eight, of hearing, the human voice, the mind—one or more, and sometimes all, yield to its destructive influence. The potent is dis-tributes throughout the system attacks every rital forces tributes throughout the system attacks every rital force and breaks up the most robust of constitutions. Ignored, because but little understood by most physicians, impotently assailed by quacks and charistans, those suffering from it have little hope to be relieved of it this side of the grave. It is time, then, that the popular treatment of this terrible disease by remedies within the reach of all passed into hands at once competens and treatworthy. The new and nitherto untried method adopted by Dr., Sanford in the preparation of his Hang-CAL CURK has won the hearty approval of thousands. It is instantaneous in affording relief in all head colds, succeiving, snuffling and obstructed breathing, and rapidly removes the most oppressive symptoms, clearing the head, sweetening the breath, restoring the senses of smell, taste and hearing, and neutralizing the constitutional tendency of the disease towards the lungs, liver and kidneys.
